ABINASH NATH PANDEY

Full-Stack Developer | MERN | Laravel | AI/LLM Applications
Kathmandu, Nepal | +977 - 9843818328 | abinashnathpandey@gmail.com
LinkedIn | GitHub | Portfolio

PERSONAL DETAILS

Full name:	Abinash Nath Pandey
Address:	Kathmandu, Nepal
Mobile:	+977 - 9843818328
Email:	abinashnathpandey@gmail.com
Date of birth:	30 December 1999
Nationality:	Nepalese
Languages:	Awadhi, Nepali, English, Hindi

OBJECTIVE

To work as a Full-Stack or AI application developer in a growing team, applying my skills in the MERN/PERN stacks, Laravel, and LLM-based systems to build reliable, scalable software, while continuing to develop my knowledge of Python, Django and Machine Learning.

PROFESSIONAL PROFILE

Computer Engineering graduate from Kathmandu Engineering College (2025) with a solid foundation in computer science and about eight months of combined professional experience across a Laravel developer internship and a Junior Software Developer role. Experienced in building responsive, scalable full-stack applications with authentication, payments and admin features, and in integrating AI/ML and NLP capabilities (LLMs, RAG, vector databases) into business applications. Comfortable collaborating through Git/GitHub and working in CI/CD and Agile workflows.

KEY ACHIEVEMENTS & AWARDS

- Reduced reporting time by 40% by automating report generation and data export during a Laravel internship.
- Optimized data pipelines handling over 1,000 records using Laravel, MySQL and Eloquent ORM.
- Integrated LLM, RAG and vector-database based applications and automated business workflows with AI in a junior developer role.
- Built many full-stack and machine-learning projects covering e-commerce with Stripe payments, a blogging platform, and a job portal and real-time pose estimation.
- Earned GitHub achievement badges, including YOLO, Pull Shark and Quick draw for contributions and activities on GitHub.

PROFESSIONAL EXPERIENCE

Junior Software Developer (Entry Level) **April 2026 – August 2026**
Software Development & AI/ML | Onsite

Responsibilities and contributions

- Developed scalable full-stack application features across the database and backend layers.
- Integrated AI/ML and NLP-based applications using large language models (LLMs), retrieval-augmented generation (RAG) and a vector database.
- Automated business workflows using AI.
- Followed Git version control, CI/CD practices and agile workflows within the development team.

Focus areas

Full-stack development, backend systems, databases, LLM applications, NLP, workflow automation.

Laravel Developer Intern **September 2024 – December 2024**
Software Development | Onsite

Responsibilities and contributions

- Optimized data pipelines for over one thousand records using Laravel, MySQL and Eloquent ORM.
- Automated the generation of reports and the export of data and created analytics dashboards.
- Reduced the time required for reporting by 40%.
- Implemented business logic with Eloquent ORM and used AI, ensuring accurate and reliable reporting.

Technologies

Laravel, PHP, MySQL, Eloquent ORM.

PROJECTS

1. E-Commerce Website **PERN Full-Stack | GitHub**

A secure full-stack online store covering the complete purchase flow.

- User authentication and an admin area for managing the store.
- Shopping cart and order management.
- Stripe payment integration.
- Backend APIs with Zod input validation; React front end built with React Hooks.

Technologies: PostgreSQL, Express.js, React.js, Next.js, Stripe, Zod.

2. PhysioDesk - Clinic Management **PERN Full-Stack | GitHub**

An application to operate patient and doctor appointment scheduling.

- Implemented secure JWT authentication with role-based authorization for Admin and Staff users.
- Developed patient management, therapist scheduling, appointment booking, rescheduling and cancellation.
- Designed RESTful APIs with FastAPI and PostgreSQL for persistent data storage.

Technologies: Python, FastAPI, Next-JS, JS, PostgreSQL, Alembic, JWT, SQL Alemy

3. Blog Website **MERN Full-Stack | GitHub**

A full-stack blogging application for users and administrators.

- Users and admins can create and manage blogs with images, titles, descriptions and categories.
- Admin management, user authentication and full CRUD operations.
- Secure backend APIs.

Technologies: MongoDB, Express.js, React.js, Node.js.

4. Cambridge Job Portal **Laravel | GitHub**

A responsive job-portal web application.

- Built with Laravel and styled with Tailwind CSS.
- Focused on improving user experience, performance and development efficiency.

Technologies: Laravel, PHP, Tailwind CSS.

5. Personal Trainer using Human Pose **Python, Machine Learning | GitHub**

An AI-powered pose estimation system for exercise coaching.

- Real-time exercise tracking using human pose detection.
- Automated feedback to the user on their exercise form.

Technologies: Python, OpenCV, Mediapipe, NumPy.

6. Virtual Hand Mouse **Python, Machine Learning | GitHub**

A responsive job-portal web application.

- Real-time hand tracking using PC camera.
- Focused on hand finger movement to cover its next process.

Technologies: Python, OpenCV, Mediapipe, NumPy.

EDUCATION

Bachelor of Engineering (BE) in Computer Engineering **Graduated - 2025**
Kathmandu Engineering College (KEC)

10+2, Science Stream **Graduated - 2018**
Prasadi Academy

School Leaving Certificate (SLC) **Graduated - 2016**
N.K. Singh Memorial E.P.S. School

TECHNICAL SKILLS

Programming:	JavaScript, PHP, Python, C, C++
Web technologies:	HTML5, CSS3, Tailwind CSS, React.js, Node.js, Express.js, Laravel
Databases:	MySQL, MongoDB, PostgreSQL
Data science & AI:	Machine learning, NumPy, Pandas, OpenCV, Mediapipe, TensorFlow, Jupyter Notebook, LLMs, RAG, vector databases, NLP
DevOps & tools:	Git, GitHub, GitHub Pages, Vercel, Netlify, Postman, PyCharm, VS Code, CI/CD
Practices:	Agile workflows, REST API development, input validation, authentication
Software & OS:	Windows 7/10/11, Office 365 (Excel, Word, Teams)
Currently learning:	Python, Django and Machine Learning Generative AI

CERTIFICATIONS & TRAINING

Code IT:	Node JS, React JS, UI/UX, Python, Django.	**2023**
Sojo Job:	Full Stack Development.	**2024**
Outskill:	Generative AI	**2026**

TECHNICAL SKILLS

Interests: Exploring emerging technologies, developing innovative solution, advancing AI skills and contributing to open-source projects.

Volunteer/activities: Keen to contribute to community initiatives, technical events, peer learning and technology-focused activities.
